

GMDC public announcement on review of the standards

GMDC is committed to ensuring quality in medical education and medical accreditation in Grenada. To maintain the rigor of its accreditation standards and remain aligned with international trends in medical education and medical accreditation, GMDC has developed a process to conduct a rigorous and systematic review of its accreditation standards at least every eight (8) years. As such, GMDC underwent a rigorous review of its Standards of Accreditation in 2021 and published the finalized Standards in August 2021. The Standards of Accreditation apply to all future accreditation reviews of currently accredited schools and schools applying for initial accreditation. If you have any questions concerning the review of the Standards of Accreditation, please contact GMDC at admin@gmdc.gd.
